Careful estimates and comparisons with the vote of last year indicate a majority of about 8,000 in Wisconsin, against the extension of suffrage. The Union majority in the State, it is now thought, may reach 10,000. The Assembly stands: Unionists, 38; Democrats, 20; independent 2; fifty districts to hear from. In Minnesota, at the rate returns are now coming, it will take a week to get a definite statement of the Union majority. It is variously estimated at from 3,000 to 5,000.

Alexander H. Stephens, Rebel ex-Vice President, having been solicited to become a candi date for Governor of Georgia, has written a letter in which he positively declines to allow his name to be used in that connection. Mr. Stephens has also refused, though strongly urged, to be a candidate for Congress.

Joshua Bennett, who recently died in Boston, left \$25,000 to the Washington Home.

The Cholera in Europe.

Accounts from Rome by yesterday's Euro-pean steamer state that since the appearance of cholera at Naples sanitary precautions have been adopted at the Roman frontier. Rome and the five adjacent provinces are reported healthy. There were twenty deaths registered at two o'clock on the 29th of October last, at Marseilles, of which four were from cholera. There were two deaths from cholera and no new cases, at La Seyne, near Toulon, on the 28th. On the same day there were four deaths at Arles, of which one was from cholera. A Te Deum was chanted in the churches of Barcelona on Sunday, October 29, in thanksgiving fer the disappearance of cholera in that city. The Moniteur du Cantal states that there are seven departments in France in which cholera has never appeared—the Cantal, Correze, Creuse, Lot, La Haute Vienne, Gers, and

Lozere.

The cholera is reported to have broken out at Woolwich, England. No fatal cases had been announced, however. Its appearance at Woolwich is by some attributed to the putrid matter brought back from the southern outfall of the sewerage, which it was anticipated would have been effectually carried off, but which often lies on the surface of the ebb tide. The disease is rapidly declining at Madrid. often lies on the surface of the ebb tide. The disease is rapidly declining at Madrid. A letter from Gibraltar (Oct. 24th.) says: "The cholera here has slain one in every 35 of the inhabitants, in three months. Of the garrison, 70 have fallen, together with some 69 of the convicts. Although the majority of cases, and indeed all those who were first attacked, were of the lower orders and persons whose habits of life and feeble state of health rendered them a ready prey to disease, the list includes many respectable people of regular and steady habits, whose subjection to the fatal spell cannot be explained. The conduct of the clergy of all denominations, and of the medical men, has been admirable, and the exertions of the Relief Committee most praiseworthy.

been admirable, and the exertions of the Keller Committee most praiseworthy.

The cholera is reported in London. The Registrar General, in his official report, announces four faill cases. At Southampton there had been three more deaths. The London Times adds: "There is at the present time in London a greater amount of fatal diarrhea than has been usually found to prevail at the end of October." end of October."

end of October."

The pestilence is on the increase in Paris. No official statistics have been published even yet, and the returns are therefore necessarily made up under considerable difficulties. It is stated, however, that the deaths have dwindled down in the hospitals from 85 to 37 per day, while those in private houses are 117 against 144, which has been hitherto the usual average. The Paris correspondent of the Star relates an odd fact. Since the cholera has broken out odd fact. Since the cholera has broken out scarcely any beer has been sold in Paris. On the other hand the consumption of rum has increased fourfold.

FINANCIAL .- The New York Commercial of FINANCIAL.—The New York Commercial of the 13th says that the stock market is dull and depressed. There is no disposition outside of the cliques to venture upon operations, and the heavy load carried by some of the bull operators compels them to realize, which can be done only upon a free concession. There is, however, great financial strength among the bulls, and it is quite likely they will engineer two or three more spasmodic advances before or three more spasmodic advances before meeting of Congress, which is regarded on all sides as the limits beyond which present prices cannot be successfully maintained. The dullness in Governments continues, and is dostered by the news from London of continued low quotations for Five-twenties. We discover no symptoms of the large demand for in vestment reported in some quarters to have been induced by the decline in prices. On the contrary, there is a large predominance of sel-lers over buyers; but, judging from the active contrary, there is a large predominance of sellers over buyers; but, judging from the active demand for money from Government brokers, there would appear to be an effort in some quarters to sustain quotations. Five-twenties of '62 declined at the board &; Five-twenties of 1865, &; Ten-forties were & lower; and Seventhirties, second series, declined &, closing at 96 &. Gold is again firmer. The demand for customs is active, and the price has ranged at 147a147 &.

ALEXANDRIA APPAIRS.—The Alexandria Gazette of the 13th says:

We learn that the Government Steam Fire Engine, No. 1, which has been in this place for the last three years, has been transferred to the Washington Fire Department, and was carried to Washington to-day. Probably Engine No. 2 will be removed to Washington, also, in about two weeks. The fire Department here, after that, will have to rely upon its own engines and hose. There are only two acting companies and Engines in this place, viz: the Friendship and Sun, and the hose is said to be much out of order. ALEXANDRIA APPAIRS .- The Alexandria out of order.

Bills have been introduced into the Legislature of South Carolina for the purpose of empowering State officers to seize all firearms found in the possession of the freedmen, to prevent them from hereafter becoming possessed of arms, and to punish with severity any white person proposing to sell the same to them. Measures are also proposed to shut up shops kept by the freedmen, and to prohibit any white person employing a negro servant without the written consent of his or her former master having first been obtained. The South Carolinians are very anxious for the removal from their fidits of all the National troops and the organization of their State militia.

Mr. Turton, from the committee on canals, reported a bill appropriating \$10,000 for the improvement of the sanitary condition of the canal by making additional flood-gates, repairing those now in use, and for cleaning the cess-pools, traps and mouths of sewers emptying into the canal.

The Chair, (Mr. T. E. Lleyd,) said that it was a useless expenditure of money to be laboring at the canal after this sort. Thousands and tens of thousands of dollars had already been spent, and if this appropriation was made, it would go the way of previous sums spent for the improvement of the canal. The flood-gates had not been one particle of benefit. In the resolution adopted a short time before, the Attorney of the Corporation had been called on for his opinion concerning the authority of the Corporation over the canal. He (the Chair) believed the only way to abate the nuisance was by putting it in the hands of a private association. He would not hesitate a moment if the Corporation had the power, to place the canal in the hands of private parties for ten years or more. The city once had a mud-machine, with which it cleaned out the canal two or three times, only to be filled up again, and now, if \$10,000 were appropriated, it would be but a drop in the bucket towards abating the nuisance. But the Corporation had better see what can be done to forever correct the evil. In his opinion it would not cost \$500,000 to do so, and the proper method would be to lessen the width of the canal, arch it over, and use it as a sewer only. The first thing they were to

Prominent Government officials had expressed themselves decidedly in favor of affording such co-operation by the Government, on the ground that the canal sewer must be used largely for the sewerage of Government buildings; and because it is absolutely necessary that the malarial nuisance south of the President's House should be abated in connection with the improvement of the canal.
